

# Inox Wind bags 170 MW order from Singapore's Continuum Wind Energy

NEW DELHI, June 17

INOX Wind Limited, a subsidiary of Gujarat Fluorochemicals Limited, one of India's leading wind power solutions provider, has been awarded a 170 MW order from Continuum Wind Energy, a Singapore-based company, indirectly majority owned by Morgan Stanley Infrastructure Partners. The project is to be constructed in and around Ratlam and Mandasaur districts of Madhya Pradesh and it is one of the largest wind turbine orders in India for a single project.

The order, valued in excess of Rs 900 crore, is for 85 units of Inox Wind's newly launched 2 MW wind turbine with 100 metre rotor diameter, a variant of its well-established 2 MW wind turbine platform. Inox shall also carry out the erection and commissioning as well as the operations and maintenance of the project. Speaking on the occasion, Kailash Tarachandani, CEO of Inox Wind Limited said: "This is a landmark order that underscores our competitive positioning across the highly competitive and growing Indian wind market. With a focus on technology and customer cen-

tricity, we have launched this new product for our clients who can achieve optimum energy yield with lower wind speeds."

Commenting on the order, Arvind Bansal, CEO and Director, Continuum Wind Energy, said: "In pursuit of our strategy of creating efficient, large scale, world class wind farms in India, we are excited to partner with Inox given their technology generates more energy in low speed winds. We believe that the successful implementation of such projects will not only result in a cleaner energy base for India but also will help empower the rural communities of Madhya Pradesh."

Inox Wind Ltd. is a part of the over \$2 billion Inox Group, which is involved in diverse businesses including industrial gases, refrigerants, chemicals, engineering plastics, cryogenic engineering, renewable energy and entertainment. It is one of India's leading wind power solutions provider with manufacturing plants in Gujarat and Himachal Pradesh. It offers a broad range of services to its customers. Presently Inox Wind is implementing projects across Gujarat, Rajasthan, MP, Maharashtra and Andhra Pradesh.
